

Jared Kaneshiro

312-459-3936 jmkaneshiro@gmail.com [LinkedIn](#) [Github](#) New York, NY

SKILLS: React, Redux, Rails, MongoDB, Express, Node.js, Ruby, JavaScript, SQL, HTML, CSS, Selenium, Cypress.io

PROJECTS:

Squirrels of Central Park *JavaScript, HTML, CSS, Leaflet.js* [live](#) | [github](#)

Presents data and stories collected from the 2018 Squirrel Census in a whimsical and informative way

- Layers, custom markers, popovers and filters allow users to view squirrel data
- geoJSON collected via both XHR call and JSON collected via the newer fetch web API
- Utilizes CSS transitions to create an interactive experience for viewing the stories shared by volunteers

InStock *MongoDB, Express, React, Node.js, Google Maps API* [live](#) | [github](#)

Allows users to mark up a map with stores that have essential items in stock

- As technical project manager, guided code merge process, and, provided support on full stack
- Utilized rem as base unit for majority of CSS to make the page more responsive
- Facilitated planning for mapping our backend JSON with the Google Maps API
- Ahead of twice-daily meetings, focused on boosting morale and monitoring progress

StayOnTrack *Ruby on Rails, React, Redux* [live](#) | [github](#)

StayOnTrack is an Agile planning tool that is more responsive than the original with cleaner design aesthetic

- Flexbox and CSS media queries used extensively for viewing at multiple screen sizes
- Modal component on dashboard for project creation
- Protected route pattern used to ensure that only logged in users may access projects

EXPERIENCE:

One Medical

Senior Product Specialist *Jan 2019 - Jan 2020*

- As an expert on the app ecosystem, trusted to plan and implement system-wide changes that affected roughly 500,000 patients and internal users
- Provided expertise on low engineering cost solutions to nuanced problems with appointments interface
- During sprint planning, presented SQL reports on the effects of recent feature launches on our users

Product Specialist *Sep 2017 - Jan 2019*

- Changed roles when I moved from SF to NYC and started working 100% remote
- Provided QA support and leadership as needed during transition

Quality Assurance Lead *Jun 2014 - Sep 2017*

- Was the only full-time quality assurance employee for first two years, while supporting 20+ engineers
- Wrote or reviewed test suites and test plans for applications on multiple platforms - iOS, Android, Angular, Ruby on Rails, React and React Native
- Coordinated daily production code releases, created + maintained release quality metric
- Managed and trained remote team of six part-time QA testers, some of whom went on to become successful full-time QA engineers

Administrative Assistant *Jul 2011 - Jan 2015*

- Created spreadsheets and standardized work for inventory management
- Supported opening of first Chicago office

EDUCATION:

AppAcademy - < 30% acceptance rate, 80+ hours of coding/lectures per week, *Jan 2020 - May 2020*

SQA Solution - QA automation certification (in Java Selenium), *Feb 2017*

University of California, Santa Barbara (UCSB) - *BA Environmental Studies, 2006-2010*
